AB - CN1322552 NOVELTY - New health food comprises an antioxidant formula which includes beta-carotene, Se, vitamin C, vitamin E, licorice extract powder, (taurine) and starch. During its preparation, licorice extract powder, selenium rich yeast, taurine, starch, microcapsulized vitamin C powder, vitamin E powder and beta-carotene are successively added and mixed, ground dried at low temperature and packed. The composition may be prepared into capsule. Eating it regularly can strengthen body's immunological, antioxidant and antisenility functions.
